

TEACH THE TIME CLOCK GAME

Learn counting, colors, shape recognition and how to tell time! It's a puzzle and a game with 3 levels of play! Self-correcting spaces reinforce the position of every piece!

CONTENTS: Clock puzzle with movable hands, 12 Double-sided Pieces (Hours /Minutes), 2 Custom Time Dice and Instructions

Level 1: Counting!

Take all the pieces out and scramble them. Spread them out in the play area, number-side up. Now have your little puzzler place them back into the clock in the right order. Self-correcting spaces reinforce the position of every piece!

Level 2: Learn Minutes!

Spread the scrambled pieces out in the play area, minute-side up. Now have your little puzzler place them back into the clock in the right spaces. Point the blue minute hand to different positions to teach the concept of minutes.

Level 3: Learn to Tell Time!

Fill in the clock just like in Level 1. Now have your little time teller roll the 2 Time Dice. The red die determines the position of the hour hand and the blue die determines the position of the minute hand.

Move the red hour hand to the correct number rolled on the red die. Next rotate the blue minute hand to the correct minute space. Take the piece out and flip it over to reinforce that the minute piece matches what was rolled on the blue minute die.
