

MISSION TO SPACE™

AGES | PLAYERS
6+ | 1 AT A TIME

COMPONENTS: Wooden game board with double-sided maze for 2 levels of play, wooden space ship with pulleys, 2 steel marbles and rules.

Launch your ship and navigate the treacherous alien atmosphere. Follow your flight plan and to avoid the deadly black holes, space worms, jelly giants, UFOs and more. Return safely home with your cargo and win!

Object: Use the precision pulley system to pull your ship and steel ball, up and through the space maze, avoiding the holes in the board. Pull and release to the right and left to steer your ship. Don't lose your (steel marble) cargo! Land safely at the "Mission Complete" and win!

Compete: Time yourself and challenge your friends to beat your best time. You'll need nerves of steel and a pilot's touch to complete your MISSION TO SPACE!

Set Up

- 1) The game board slides out of the game and is reversible. Note the easy side and hard side in Fig. 1.

Fig.1

- 2) Place the rocket ship in the launching dock as shown in Fig. 2 and place a steel marble inside the rocket ship.

Fig.2

Play:

When you're ready to launch, pull down on the pulley handles as shown in Fig. 3. It takes some pilot training to get control of the handles. For instance, to move the rocket ship directly to the right, you need to pull the right handle, while at the same time, letting up on the pulling of the left handle. As you pull and release the tension on each string, you can learn to control the trajectory of the rocket ship! Follow the white path on the board to travel up and around the holes and then drop the marble in the MISSION COMPLETE hole to win! If the steel marble falls in another hole, your mission is scrapped and you'll have to start over!

Fig.3

Challenge Yourself and Others!

Play the easy side of the board and land your rocket ship safely with your cargo! Now play the hard side. Can you do it?! Time yourself playing either side and challenge your friends to beat your best time!
